

## BLACK FOREST FOCUS ON SOFT MATTER 6

IMTEK Laboratory for Biomedical Microtechnology

# MAGNETIC RESONANCE MICROSYSTEMS

The workshop will focus on miniaturization issues of magnetic resonance equipment and experiments. Motivated by the potential applications, many research groups are developing innovative approaches to deal with these challenges. We believe the time is critical to bring together researchers representing science, engineering, as well as applications to form a new scientific community and share their ideas, findings, and, perhaps most importantly, challenges.

## JULY 26–29, 2011

### Keynote Speakers include:

---

**Bernhard Blümich**, RWTH Aachen, Germany  
**Luisa Ciobanu**, CEA Saclay, France  
**Christian L. Degen**, MIT, USA  
**Masoyoshi Esashi**, Tohoku University, Japan  
**David Hault**, CNRC, Canada  
**Arno Kentgens**, Radboud University, Nijmegen, NL  
**Tetsuo Kobayashi**, Kyoto University, Japan  
**Jeremy Nicholson**, Imperial College, UK  
**Martino Poggio**, University of Basel, Switzerland  
**Dimitris Sakellariou**, CEA Saclay, France  
**John A. Sidles**, University of Washington, USA  
**Hans W. Spiess**, MPIP Mainz, Germany  
**Rob Tycko**, NIDDK, USA

### Local Scientific Coordination:

---

**Jan G. Korvink**, FRIAS, IMTEK, University of Freiburg  
**Jürgen Hennig**, Dept. of Radiology, Freiburg University Clinic  
**Ulrike Wallrabe**, IMTEK, University of Freiburg  
**Marcel Utz**, Dept. of Mech. Eng., University of Virginia, USA  
**Vlad Badilita**, IMTEK, University of Freiburg

### Location:

---

Saig / Lenzkirch, Black Forest, Germany  
**Hotel Saigerhöh**

### Information & Online Registration:
