

FROBio: Freiburg Robotics and Biology Conference

Bringing together nature and technology

FRIAS
Conference

istock/koya79

Despite several cross-disciplinary research fields, including bioinspiration, biomimetics, biohybrid, and neurorobotics, direct connections between biologists and robotic engineers are still rare. With this conference we aim to foster interactions between natural scientists and engineers from different fields and career stages, so that they can exchange their expertise, learn about new technologies and potentially establish new collaborations on research questions that are nearly impossible to tackle from a single field of study.

Speakers:

- Bilge Baytekin
- Michaela Eder
- Claudius Gros
- Josie Hughes
- Matěj Karásek
- Mirko Kovac
- David Labonte
- Jennifer Li & Drew Robson
- Michael Lutter
- Barbara Mazzolai
- Mariana Medina Sánchez
- Florian Röhrbein
- Anna Stöckl
- Andrew Straw
- Thomas Speck
- Abhinav Valada

22.–24.11.2023
